# Calvisol PLUS

Calcium 500mg + Vitamin D 400IU + Magnesium 100mg + Zinc 10mg

Calvisol PLUS *provides the following benefits to your patients*

- Calcium is needed to protect and preserve women's bones.
- Consuming an adequate amount of calcium during pregnancy helps women avoid developing preeclampsia.
- Vitamin D is necessary for the absorption and metabolism of calcium.
- Vitamin D increased intestinal calcium absorption during pregnancy meets fetal calcium demands.
- Magnesium helps to reduce the risk of cerebral palsy in babies who are born preterm.
- Evidence suggests that zinc supplementation during pregnancy may help to reduce preterm births.
- Vitamin D may be protective against colon and colorectal cancers.
